

What Magnets Can and Cannot Pull

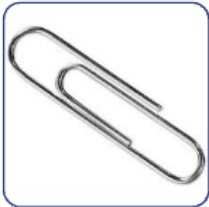

Activity goals

- Sort objects by matching them to 'magnet attracts' or 'magnet does not attract.'
- Explain findings by sharing which objects a magnet can pull and which ones it cannot.
- Reflect on their learning by rating their confidence and answering short questions about their matches.

Instructions:

Read each object. Decide if a magnet can pull it. Then, match each object to the right box by drawing an arrow!

1 Match the objects with the right box!

Paperclip

Pencil

Button

Key

Coin

A small round piece of money; it is made of metal

A little metal tool that unlocks doors; it is made of metal.

A tiny metal clip that holds papers; it is made of metal.

A tiny round piece on clothes; it is not made of metal.

Made of wood and used to write or draw. It will not move when you bring a magnet close.
